

Part of the IO3, the teachers' capacity building program, was the development of 3 Handbooks. The first of the three handbooks, includes two parts that would introduce HEI teachers to the **SDGLabs** methodology and background theory. The "how-to" handbook guide could be used by the teachers to expand their understanding of the SDG theoretical basis, explaining the basics of the Living Labs methodology. Along with it, HEI teachers can find which are the steps towards the facilitation and application of an **SDGLab** in their disciplines.

SDG LABS

Harnessing the potential of the Social Economy towards a green transformation
through the establishment of Socially Driven Green Labs within Universities

**Socially Driven Green Labs capacity building
programme**

How-to Guide
